ARMCHAIRS

Antonio Citterio

Description

A comfortable hollow shape, in two sizes, that stands on a series of bases that create the overall character. The combination of these elements produces a family of armchairs with strong personality. At the origin of all of them, a long experimentation centred on the production technology of thermoformed leather, starting from a plastic shell that is inserted into a mould for the cold foaming of polyurethane, with the result of obtaining elasticity and comfort.

Technical information

Internal frame:

glass fibre shell

Internal frame upholstery (thick leather and leather version):

Bayfit® (Bayer®) flexible cold shaped polyurethane foam
