# Doppler sideboard, Doppler K sideboard

Designer: Giuseppe Viganò

The Doppler sideboards are inspired by the illusion of overlapping surfaces, whereas actually the doors are made up of a single surface: indeed, it is the combination of various brightly coloured graphic patterns that creates this particular optical effect. The asymmetrical opening of the doors is an additional sign of originality. The lacquered wood frame is supported by a solid wood base. Doppler sideboards are available in two different sizes:

one high and the other low, to furnish both the living room and the bedroom. The Doppler K sideboards supplement the Doppler sideboard collection. They are available in the same sizes and propose the same asymmetrical opening of the doors, which in this case are made of ceramic; the frame is in white or black lacquered wood and is supported by a metal base.
