

BONALDO

Note

Designer: Mario Mazzer

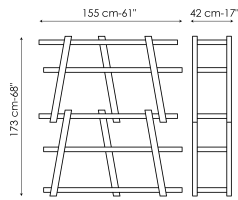

An original interpretation of the bookcase, a pentagram where the notes are the books and objects, all together composing the image of a very personal melody. Characterised by a design that it would be correct to define as harmonious, the Note bookcase is visually characterised by the significance of the vertical elements, arranged obliquely, and it can be combined with the Note Sideboard for furnishing with a consistent and

cohesive style. The horizontal surfaces and the vertical inclined axes are available in many combinations and wood finishings, for a result that looks at authenticity and naturalness and is able to satisfy the most varied aesthetic needs. An object with two stories to tell: the story of the person who designed it and that of the person who made it his or her own.
